Chemistry is the scientific discipline involved with elements and compounds composed of atoms, molecules and ions: their composition, structure, properties, behavior and the changes they undergo during a reaction with other substances. In the scope of its subject, chemistry occupies an intermediate position between physics and biology. It is sometimes called the central science because it ...

Computational chemistry is a branch of chemistry that uses computer simulation to assist in solving chemical problems. It uses methods of theoretical chemistry, incorporated into efficient computer programs, to calculate the structures and properties of molecules and solids. It is necessary because, apart from relatively recent results concerning the hydrogen molecular ion (dihydrogen cation ...

An exciting achievement in materials and polymer chemistry in recent decades is the ability to create large synthetic nanostructures with well-defined shapes and atomic structures in a rational and efficient manner. On page 2019, Miriam Strumia and colleagues present the development of ...

Journal of Polymer Science Part A: Polymer Chemistry

Theoretical chemistry is a branch of chemistry, which develops theoretical generalizations that are part of the theoretical arsenal of modern chemistry, for example, the concept of chemical bonding, chemical reaction, valence, the surface of potential energy, molecular orbitals, orbital interactions, molecule activation etÑ•.

Science Journal of Analytical Chemistry(SJAC) provides a forum for the publication of scientific research and review articles. The journal publishes original full-length research papers in all areas related to theoretical and objects analyzed applied aspects of analytical chemistry. General issues contain critical review articles, news, meeting reports, book reviews and meeting announcements.
