

command decision project gleise pdf

The European Train Control System (ETCS) is the signalling and control component of the European Rail Traffic Management System (ERTMS). It is a replacement for legacy train protection systems and designed to replace the many incompatible safety systems currently used by European railways. The standard was also adopted outside Europe and is an option for worldwide application.

European Train Control System - Wikipedia

Although Dresden is a relatively recent city of Germanic origin followed by settlement of Slavic people, the area had been settled in the Neolithic era by Linear Pottery culture tribes ca. 7500 BC. Dresden's founding and early growth is associated with the eastward expansion of Germanic peoples, mining in the nearby Ore Mountains, and the establishment of the Margraviate of Meissen.
