Algorithmic trading is a method of executing a large order (too large to fill all at once) using automated pre-programmed trading instructions accounting for variables such as time, price, and volume to send small slices of the order (child orders) out to the market over time. They were developed so that traders do not need to constantly watch a stock and repeatedly send those slices out manually.

Algorithmic trading - Wikipedia

Qualification Description. This qualification reflects professional accounting job roles in financial services and other industries, including tax agents, accounts payable and accounts receivable officers, payroll service providers, and employees performing a range of accounting tasks for organisations in a range of industries.
